

Project Title

AI-Powered Medical Symptom Checker & First Aid Assistant using IBM watsonx Orchestrate

Problem Statement

Access to basic healthcare guidance is often limited due to a shortage of medical professionals, long waiting times, and lack of awareness. Many individuals are unable to identify the seriousness of common symptoms or provide appropriate first aid before reaching a healthcare facility.

An AI-powered healthcare assistant can provide general symptom guidance, first aid recommendations, and wellness advice while encouraging users to consult healthcare professionals for accurate diagnosis and treatment.

Objectives

- Develop an AI-powered Medical Symptom Checker.
 - Provide guidance for common symptoms.
 - Suggest basic first aid measures.
 - Promote healthy lifestyle habits.
 - Identify emergency warning signs.
 - Use a medical knowledge base for reliable information.
 - Encourage users to seek professional medical care when necessary.
-

Proposed Solution

The proposed solution is an AI-powered Medical Symptom Checker developed using IBM watsonx Orchestrate.

The agent interacts with users using natural language, collects symptom information, and provides general health guidance. It utilizes a medical knowledge base containing information about common symptoms, first aid, emergency warning signs, and healthy lifestyle recommendations to generate informative responses.

IBM Technologies Used

- IBM Cloud
 - IBM watsonx Orchestrate
 - IBM Foundation Model (Granite / GPT Foundation Model)
 - AI Agent Builder
 - Knowledge Base
 - PDF Knowledge Sources
-

Expected Outcome

The Medical Symptom Checker will:

- Provide general symptom guidance.
 - Suggest first aid recommendations.
 - Identify emergency warning signs.
 - Promote healthy lifestyle practices.
 - Improve public awareness regarding preventive healthcare.
-

Conclusion

The Medical Symptom Checker demonstrates how IBM watsonx Orchestrate can be used to build intelligent healthcare assistants that provide reliable health guidance while encouraging users to seek professional medical advice for diagnosis and treatment.
